

# Limited-Time Upgrade Offer

Agilent ICP-OES, MP-AES and AAS Software

## ICP Expert Software

Agilent ICP Expert Software for 5800/5900 and 5110/5100 ICP-OES simplifies method development with an intuitive worksheet interface. Smart tools reduce remeasurement and boost confidence—IntelliQuant captures concentration data for up to 70 elements, supported by built-in QC and method templates. The software also automates dilutions with the Advanced Dilution System (ADS 2) autodilutor, improving efficiency. Optional SCM and SDA modules streamline 21 CFR Part 11 compliance.

## MP Expert Software

Agilent MP Expert software gives you full control of your analysis. Proprietary features like Auto background correction and Fast Linear Interference Correction (FLIC) ensure accurate results, while intuitive workflows guide you from method setup to final reporting with confidence.

## SpectrAA Software

Agilent SpectrAA Software provides a single, intuitive interface for controlling your AA instrument, viewing results, and monitoring signals. The user-friendly design supports users of all experience levels, while the PRecision Optimized Measurement Time (PROMT) mode speeds up analysis and boosts productivity. SpectrAA also streamlines workflows with easy method development, flexible reporting, and consumables tracking.

## Limited-Time Upgrade Offer!

Windows 10 support has ended — make sure your ICP-OES, MP-AES, and AAS software is updated and running on Windows 11 to remain supported and secure.

For customers looking to upgrade their ICP Expert, MP Expert and SpectrAA Software to the Windows 11-supported version, a limited-time upgrade offer (**Promotion 3265**) is available.

Please contact your local Agilent office/representative to take advantage of the offer.
